

Our program:

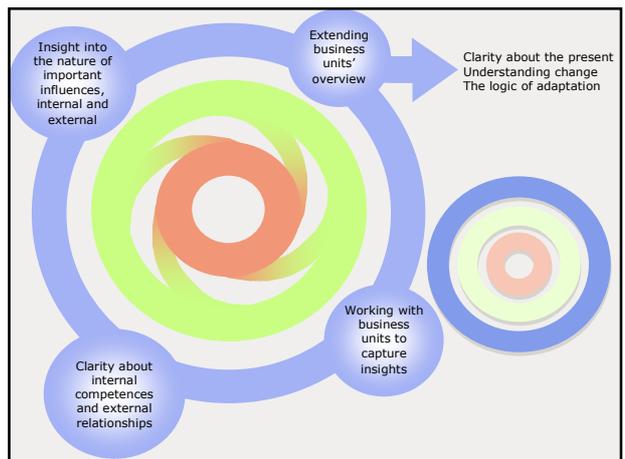

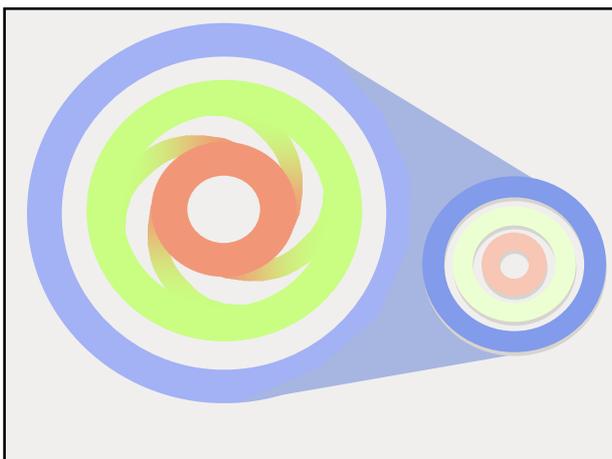

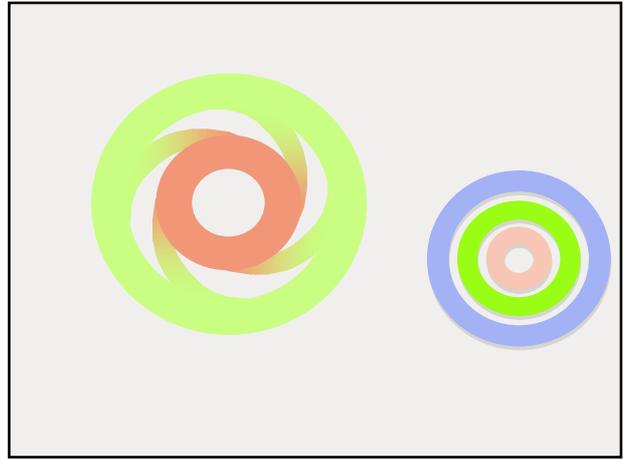

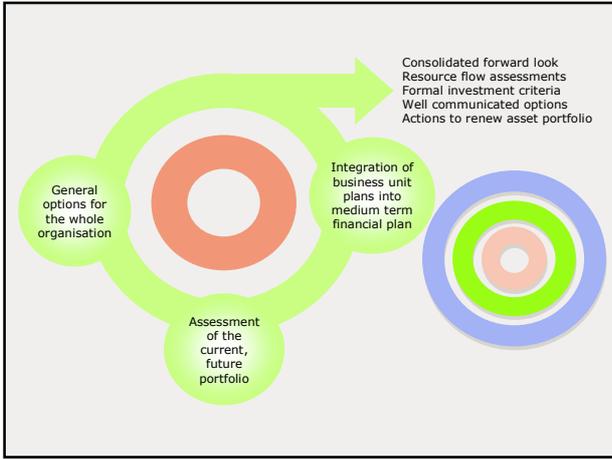

- The quickening pace of change
- Models of adaptation
- On renewing an organisation
- The infrastructure of renewal
 - Insight
 - Values
 - Narrative
 - Options
 - Machinery
- Managing for renewal

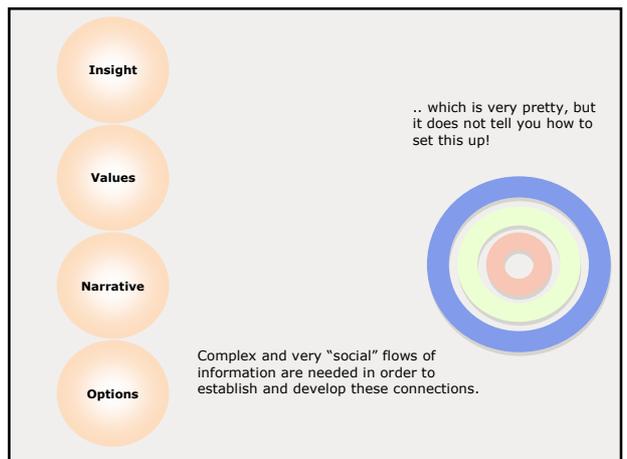

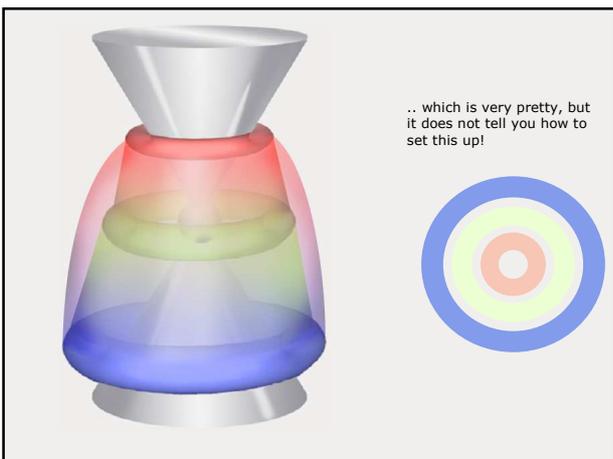

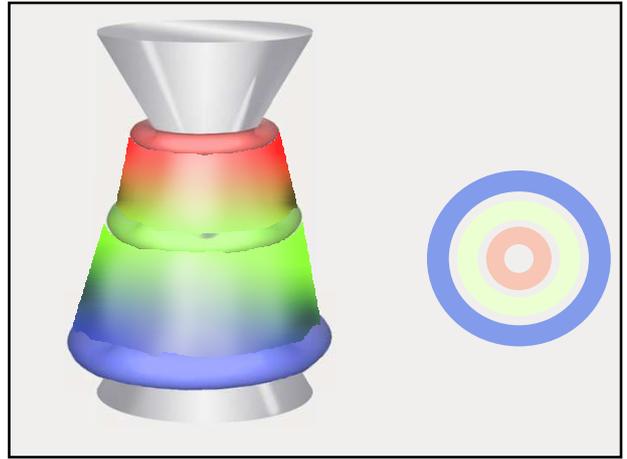

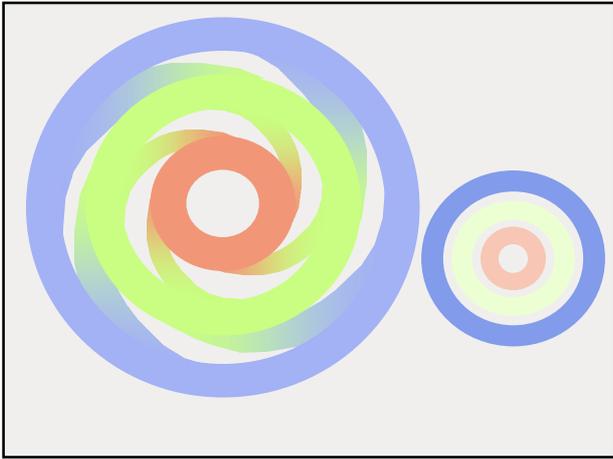

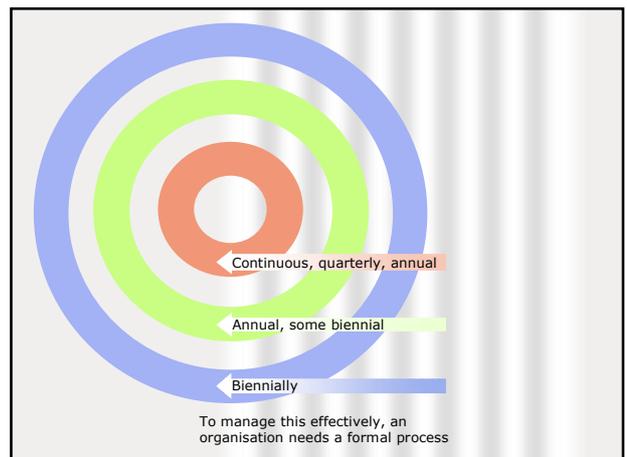

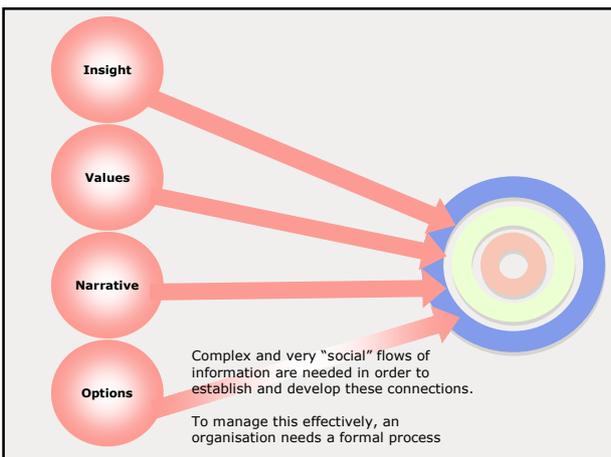

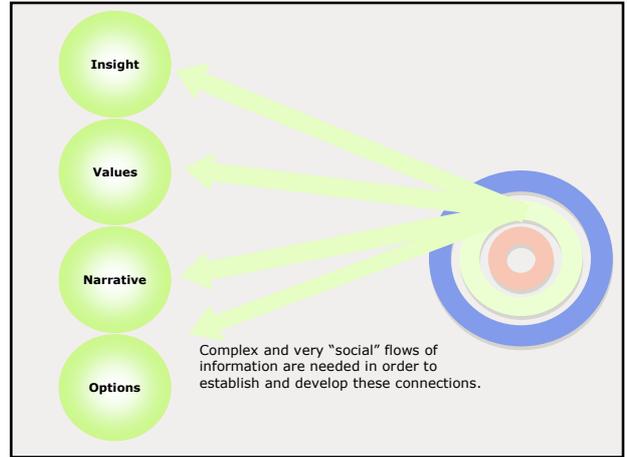

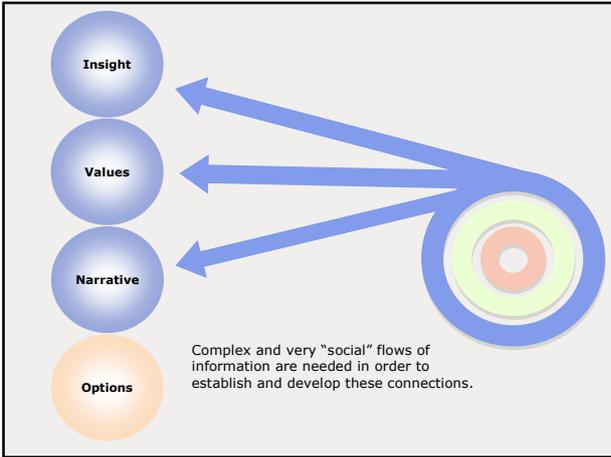

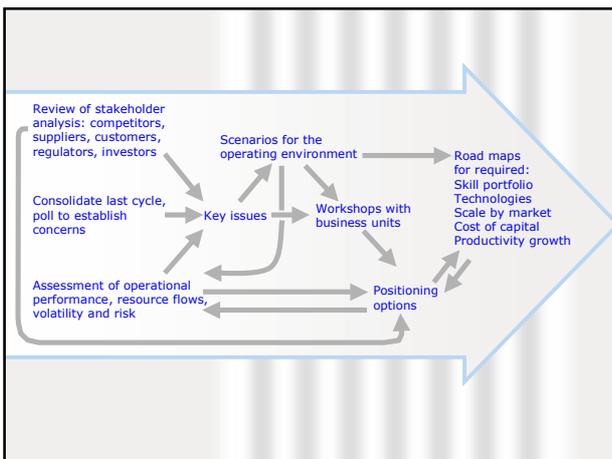

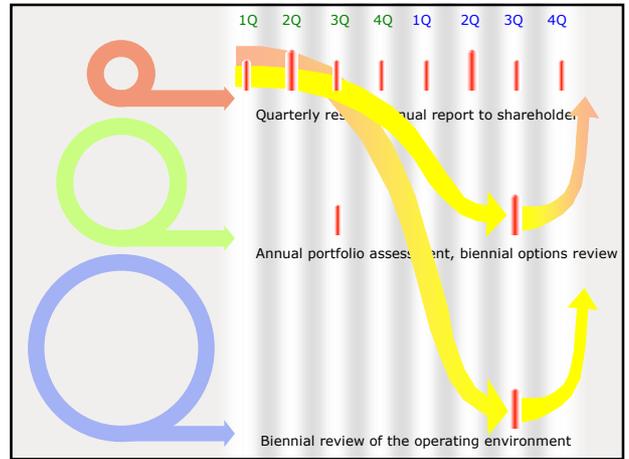

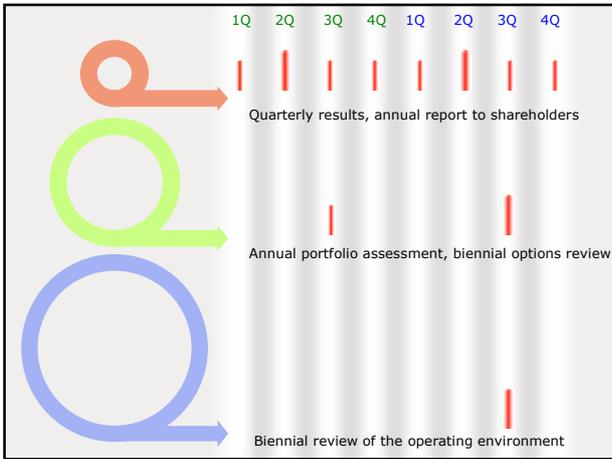

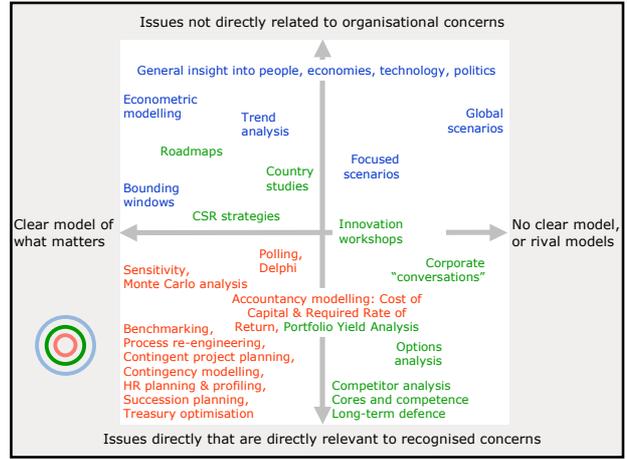

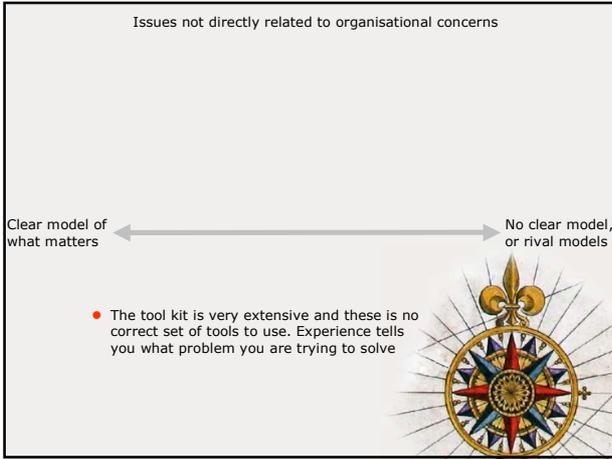

Machinery: basic messages

- There is no "right structure". Each organisation will be different.
- The important elements need to be organised into processes that are predictable, both in their timing and the quality of their output. These processes need to connect together.
- The processes must touch and connect the three "rings"
- The outcome of the processes must work on and enrich the four basic elements:
 - Insight into how "things work"
 - Values about what the organisation wants
 - Options that point to generic targets
 - Narrative that makes this automatic
- The tool kit is very extensive and these is no correct set of tools to use. Experience tells you what problem you are trying to solve

Machinery: basic messages

This looks complex. It is complex. That is why it can be used to make money, and to avoid costly mistakes.

Nevertheless, this is not an expensive thing to undertake. One can start quite simply. However, it is a major task of organisation (and persuasion).
